# **SITUATION SUMMARY**

## **COASTAL REGION ACTIVITY:**

### **Port of Oakland Protest (No Change)**

Oakland Police Department (OPD) is expecting 500-1000 demonstrators on Saturday, August 16, 2014 to protest the ships partly owned by the government of Israel. Although no law mutual aid has been requested, the Port has reached out to Alameda County Sheriffs Office (ACSO) for Law Enforcement support. The distinction is that this is a planned event and therefore not technically mutual aid. OPD is planning on having their Department Operations Center (DOC) open on Saturday. The protest is planned to occur, even if the ships cancel their arrival to the Port. Cal OES Law Enforcement Branch and the Cal OES Ports and Harbors representative continue to monitor the situation and coordinate information.

### **Hurricane-Tropical Storm, Hawaii, Pacific Ocean (Update)**

- (2) OES staff and (1) CNG departed 8/8/2014, expected to return, 08/22/14.

# **SITUATION SUMMARY**

## **San Bernardino County Flooding, San Bernardino County (No Change)**

### **Update:**

- San Bernardino County Operational Area activated at Level I Duty Officer status, for the purpose of monitoring, and situational awareness due to the anticipated return of monsoonal moisture to the region. These storms are predicted to bring a potential for lightning strikes, and flash flooding, which could adversely impact areas already affected impacted by the August Severe Weather Incident of last week.
- At 1728 hours, 08/11/14, San Bernardino County Operational Area deactivated.

Background: On 08/03/14, the Southern Duty Officer (SDO) was notified by the California State Warning Center (CSWC) that San Bernardino County Operational Area (SBOA) emergency operations center (EOC) had activated at a Level I in support of the significant flood events for the following areas in San Bernardino County; Forest Falls, Mount Baldy, Oak Glen and Lytle Creek. Flash floods Sunday brought thick debris flows that cut off access to towns. Numerous residents in the San Bernardino Mountains were unable to get out because the roads were covered with mud, rock and debris. Per the SDO there are no unmet emergency management and access and functional needs (AFN) nor any requests for State assistance.

## **Cal EOC Incident – 2014 Drought**

- SOC / Inland REOC remains activated in support of 2014 Drought

# WEATHER

## **Significant Weather**

The National Weather Service (NWS) is forecasting increased thunderstorm potential for interior portions of northwest California through Tuesday, August 12th; mainly afternoon and evening hours.

Red Flag Warnings and Fire Weather Watches have been issued for northern CA and much of OR through Tuesday.

Flash Flood Watch in effect from noon today through Wednesday for southeast California.

## **Potential Event Highlights:**

- A low pressure system will form off the west coast on Saturday and settle to just off the northern CA coast by Sunday. The dynamics of this system along with residual moisture, daytime heating and a strengthening jet stream will result in perfect conditions for a significant and widespread thunderstorm outbreak event beginning Sunday and continuing through at least Tuesday, with nocturnal storms a good possibility.
- A significant number of dry lightning strikes are expected with these storms along with strong gusty outflow winds.
- Warm and very dry conditions currently exist and are forecast to continue throughout much of this region this weekend and into early next week.
- All of these ingredients add up to high potential for several large fire starts.
- Northwest CA and southwest OR look to be the focus of this event although the rest of northern CA and the rest of OR will likely see thunderstorms as well.
- The most critical time for lightning started fires is Sunday afternoon and evening (8/10) and again on Monday (8/11) and Tuesday (8/12) across OR.

# WEATHER

## WEATHER SYNOPSIS BY REGION:

### **NORTHERN CALIFORNIA AND CENTRAL COASTAL AREAS:**

#### **Eureka Weather:**

An upper low moving into northern California will bring a chance of mostly dry thunderstorms into this morning. A few residual thunderstorms will continue into Wednesday. Temperatures over the interior will decrease through midweek then increase again by the end of the week.

#### **San Francisco Weather:**

Temperatures will remain on the cool side of normal through midweek as an upper level trough impacts northern California. Dry weather conditions and a slight warming trend can then be expected for the latter half of the week.

### **CENTRAL CALIFORNIA AND SOUTHERN SAN JOAQUIN VALLEY**

#### **Sacramento Weather:**

The forecast area will have a decreased thunderstorm threat today as the low pressure system that's been off the Bay Area coast the past several days' moves inland this morning. Another weather system moves across far northern California on Wednesday resulting in cooler and breezy weather for the region. Dry and milder weather returns for the later portion of the week.

#### **Hanford Weather:**

Thunderstorms will be possible over the Sierra Nevada Crest today as a trough of low pressure moves through to the north. Otherwise, expect a dry southwesterly flow with steady temperatures for the remainder of the week.

# WEATHER

## WEATHER SYNOPSIS BY REGION: (Cont.)

### **SOUTHERN CALIFORNIA:**

#### **Los Angeles Weather:**

Southwest flow aloft will result in drier air moving into the region bringing an end to the thunderstorm threat for the mountains and desert for tomorrow. Daytime highs will remain near or slightly below normal for the week ahead with night through morning low clouds and fog along the coast.

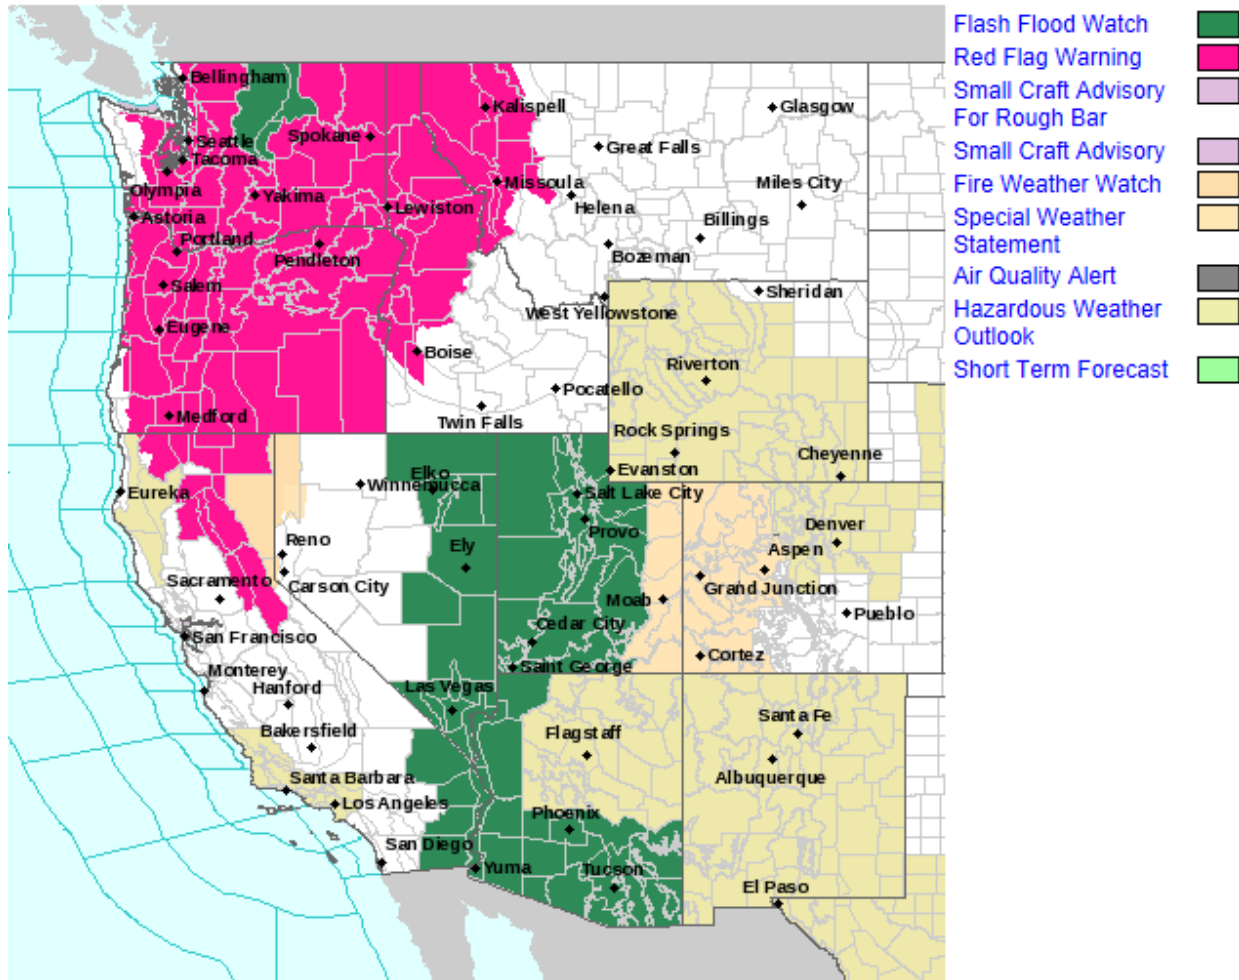

#### **Extreme Southwestern California Including Orange, San Diego, Western Riverside and Southwestern San Bernardino Counties:**

Modest monsoon moisture will bring a few thunderstorms to the mountains and deserts, mainly this afternoon and evening. An upper level low pressure system moving through central California will bring slight cooling today and Wednesday. For Thursday through early next week, southwest flow aloft will bring dry weather with near or slightly below normal temperatures and areas of night and morning coastal low clouds.

#### **Southeast California Weather:**

Moisture levels will continue to increase today ahead of an approaching low pressure system. Showers and thunderstorms are expected today and tonight through much of the area. Some storms will be capable of producing very heavy rain and areas of flooding. With moist conditions, temperatures will remain below normal the next few days. A drying and warming trend is expected late in the week as high pressure becomes reestablished to the south.

### Situational Summary

On January 17, 2014 Governor Edmund G. Brown proclaimed a State of Emergency and directed state officials to take all necessary actions to prepare for drought conditions. The State Operation Center (SOC) is activated to implement objectives in support of the Governor's priorities. The lack of winter rain and snowfall has resulted in extremely dry conditions in many parts of the State. Reservoir levels are down significantly from where they should be on average for this time of year. If conditions continue severe impacts to municipal water supplies, agriculture (plants and livestock) and firefighting capabilities are likely in store for the State over the next few months. Negative economic impacts will also result.

The drought could result in severe impacts to the municipal water supplies, wells, agriculture (plants and livestock) and firefighting capabilities for several months. The SOC continues to be activated to monitor the situation statewide, and support regional and local operational areas.

- Current Reservoir Levels continue to decline. Levels as of August 10<sup>th</sup> : Don Pedro 43%; Exchequer 19%; Folsom Lake 40%; Lake Oroville 34%; Millerton Lake 50%; New Melones 25%; Pine Flat 12%; San Luis 20%; Lake Shasta 33%; Trinity Lake 33%; Pyramid Lake 93%; and Castaic Lake 47%.

- Emergency Drinking Water Procurement and Distribution Planning Guidance (rev. May 2014)  
Significant changes have occurred to the structure of California's state government organization. Rapid advances in systems, science, and technology have helped emergency managers improve coordination, forecasting, and situational awareness. Because of these changes, the *Multi-Agency Emergency Response Procedures for Potable Water Procurement & Distribution* document has been replaced by the *Emergency Drinking Water Procurement and Distribution Planning Guidance*. The intent of this guidance document is to clarify the roles and responsibilities of the stakeholders involved in locating, procuring, and delivery of emergency drinking water<sup>1</sup> to populations in California. Consequently creating a framework for agencies and organizations to work together to enhance preparedness.

## Situational Summary

- State Board Mandatory Conservation Regulations Now in Effect: The state's first-ever emergency regulations mandating urban water conservation became effective will be in effect until April 25, 2015.
